Call for Papers

Communication Theory Symposium

Symposium chairs

- Deniz Gunduz, Imperial College London, UK
d.gunduz@imperial.ac.uk
- Harpreet S. Dhillon, Virginia Tech, USA
hdhillon@vt.edu
- Mark Flanagan, University College Dublin, Ireland
mark.flanagan@ieee.org

Scope and Topics of Interest

The Communication Theory Symposium will focus on the fundamentals of communication systems, with an emphasis on wireless and wireline communications. The symposium welcomes original and innovative research in these general areas, focusing on the physical layer and its interactions with higher layers. High quality papers reporting on applications of communications theory from both industry and academia are encouraged. To ensure complete coverage of the advances in this field, the Communication Theory Symposium cordially invites original contributions in, but not limited to, the following topical areas:

- Adaptive Modulation and Coding
- Channel Estimation and Synchronization
- Coding Theory
- Communication Theory Aspects of Distributed and Edge Computing
- Communication Theory Aspects of Networks and Cross-Layer Design
- Detection and Estimation Theory
- Diversity and Fading Countermeasures
- Feedback in Communication Systems
- Fundamentals of Cache-Aided Communication
- Fundamentals of Heterogeneous and Small-Cell Networks
- Interference Management, Cancellation, Alignment, and Avoidance
- Information Theory
- Iterative Techniques, Detection, and Decoding
- Source Coding and Data Compression
- MIMO and Massive MIMO
- Multiple Access, Radio Resource Management, and Scheduling
Submission Guidelines

The IEEE ICC 2020 website (icc2020.ieee-icc.org) provides full instructions on manuscript format and how to submit a manuscript. You will select the desired symposium/track when submitting your manuscript.
